

THE STATE OF UTAH

OFFICE OF STATE ENGINEER

SALT LAKE CITY

June 14, 1937

T. H. HUMPHERYS

STATE ENGINEER

Mr. J. T. Leigh,
Cedar City, Utah.

Dear Sir:

REL: COAL CREEK DISTR.

There is enclosed herewith a supply of blank forms of Application for Temporary Change of Point of Diversion, Place or Purpose of Use, made in conformance with Section 100-3-3, Revised Statutes of Utah, 1933 as amended by the Laws of Utah, 1937. Please go over them, studying carefully the rules and regulations on the back thereof, following which if there be anything that you do not understand, please advise and I will attempt to clear it up for you.

These Applications are to be made in duplicate, preferably in the field, by the applicant and filed with you, - the Commissioner, following which you are to make a field examination and report, with recommendations. If there be no rights interfered with, the State Engineer will approve the Application. If there be rights interfered with, however, it will be necessary to hold a hearing, as provided by law, before a decision will have been rendered.

Please bear in mind that extreme care must be exercised in making any temporary change. None will be acted on in this office before a complete report will have been made and submitted by the Water Commissioner. To a great extent, therefore, the State Engineer must depend on you, making it imperative that you use the greatest possible care and your best judgment in all cases where temporary changes are requested.

Yours very truly,

T. H. Humpherys
STATE ENGINEER
